

I graduated from Wilfrid Laurier University in the Winter of 2010 from the Honours Biology w/ Enviro. Sci option program. I have a keen interest in research and conservation, with special regards to the fisheries. During the 2009-2010 school term I completed an Honours Thesis project on Brown Trout (*Salmo trutta*) migration, habitat use, and passive integrated transponder (PIT) tag retention, under the supervision of Mike Wilkie, PhD, and Jane Rutherford, PhD,. During this time I worked very closely with organizations such as the Ontario Ministry of Natural Resources (OMNR), Trout Unlimited (TU), and the Grand River Conservation Authority (GRCA). I am an avid outdoorsman, hard worker, team player, and self-motivated individual that is ready to work.

Thank you for your consideration,
Shaun Anthony, BSc.
